

Ethan Orain

AI Engineering Intern — Multi-Agent Systems & RAG Pipelines

Looking for an internship between Now and August 2026

AI engineering student at Aivancity specialized in RAG systems and multi-agent architectures, with hands-on experience building reliable, low-hallucination LLM pipelines. Seeking a research or engineering internship to contribute to agentic AI development.

Skills

AI / ML

- RAG Pipelines · Multi-Agent Systems
- LLM Orchestration · Embeddings

LLM STACK

- LangChain · Mistral AI · Hugging Face

LANGUAGES

- Python · TypeScript

BACKEND

- FastAPI · REST APIs

FRONTEND

- React · Next.js

Languages

- French (Native)
- English (B1)
- Spanish (A2)

Hackathons

- HighSwing.ai — AI Caddie
  2nd place · AI for Sports hackathon

Volunteer

- Python & AI teacher
  Microtel 91 · middle school students

Interests

- Scuba diving — N3 · Nitrox

Experiences

Jan 2026 - Apr 2026: Clinical AI Project — Multimodal RAG
for Faculties.ai at Aivancity, Villejuif (94), France

- Multimodal AI architecture design (vision + audio): benchmarked 5 RAG strategies — Simple, Agentic, Graph, Speculative, HyDE
- Comparative analysis of retrieval quality and response relevance across approaches

Oct 2025 - Dec 2025: Clinical AI Project — Explainable Scoring System
for JUDICIA at Aivancity, Villejuif (94), France

- Explainable AI scoring system (Python + Mistral AI) combining RAG and embeddings to generate grades with legally grounded explanations (Légifrance)
- Low-hallucination pipeline: cosine similarity search, database integration, and explainability logic

Jan 2025 - Apr 2025: Clinical AI Project — GPS Mobility Analysis
for Egerine at Aivancity, Cachan (94), France

- Compared cyclists' GPS routes for a partner company to identify most-frequented locations
- Geospatial preprocessing, route frequency modelling, and interactive visualization

Other Projects

2026: Multi-Agent DRI Architecture
github.com/Erazor48/Multi_Agent_DRI_Architecture

- Hierarchical multi-agent platform: a business pitch submitted to a root CEO agent spawns a full autonomous company structure
- Agents autonomously delegate, negotiate, and self-organize via LLM-based dynamic role assignment (Python)

2025: Portfolio & AI Chatbot ethan-portfolio-xi.vercel.app

- Responsive portfolio with an integrated AI chatbot built on LangChain + Google API, deployed on Vercel
- Chatbot answers queries about skills and projects from a custom knowledge base

2025: Eviverse — 3D AI Platform github.com/Erazor48/Eviverse

- Conversational interface for 3D object generation from text/image prompts (FastAPI + React + SQLAlchemy)
- Persistent project threads via SQLite; full REST API backend with async processing

Education

Sep 2024 - Present: Aigeneur (AI Engineering)
at Aivancity, Villejuif (94), France.
5-year Grande École program. Field: Data & AI. Focus on Law, Ethics & Technology.

Sep 2022 - Apr 2024: CUPGE — Maths / Computer Science
at Unicaen, Caen (14), Normandie.
Computer Science: Python, C, HTML/CSS. Mathematics: Algebra and Analysis.

Sep 2019 - June 2022: General Baccalaureate
at Edmond Michelet High School, Arpajon (91), France.
